

ABDALRAHMAN BSHARAT

COMPUTER SYSTEMS ENGINEER

www.linkedin.com | abd.bsharatt@gmail.com | +970 (56) 877-2468

Computer Systems Engineering graduate with practical experience in backend development using Spring Boot (JPA/Hibernate, JWT, REST APIs, MySQL) and mobile development with Flutter (Dart). Skilled in API design, integration, and debugging, and proficient in Java, C++, HTML/CSS, JavaScript, and SQL. Passionate about building reliable, efficient software solutions with clean architecture, strong testing practices, and continuously expanding knowledge in software engineering, AI, and data-driven technologies.

EDUCATION

Bachelor of Computer Systems Engineering	2020 - 2025
Arab American University	Paelstine

WORK EXPERIENCE & TRAINING

Frontend Developer Dopa Solutions — On-site	Nov 2025 – Present
- Develop and maintain mobile application user interfaces using Flutter, focusing on performance, responsiveness, and clean UI design. - Manage application state using GetX for efficient, scalable, and reactive state management. - Collaborate with designers, backend developers, and QA to deliver stable and user-friendly mobile features. - Use Git and GitHub for version control, following team workflows (branching, pull requests, code reviews). - Participate in bug fixing, UI enhancements, testing, and deployment preparation.	
Data Science & AI Training Gaza Sky Geeks (via DataCamp) – Remote	Oct 2025 – Oct 2026 (Ongoing)
- Participating in a 1-year intensive training program covering AI, Machine Learning, Data Science, Data Engineering, and Data Analysis. - Completing hands-on projects and interactive coursework on DataCamp using Python, SQL, and key libraries (Pandas, NumPy, Scikit-learn, TensorFlow). - Gaining practical experience in data visualization, model building, and data pipelines through guided exercises and assessments.	
Backend Developer (Training) Logistechs – Hybrid	Aug 2025 – Oct 2025
- Developed Spring Boot REST APIs with JPA/Hibernate and validation. - Implemented JWT-based authentication/authorization and role-based access. - Worked with MySQL (DDL/DML, indexing) and Postman for API testing; wrote JUnit tests. - Used GitHub Copilot and ChatGPT to accelerate boilerplate (DTOs, repository methods), and improve PR descriptions.	
Mobile Developer (Training) Dopa Solutions – Remote	Jul 2024 – Dec2024
- Built Flutter features (widgets, navigation, forms) and integrated REST APIs . - Implemented Firebase Auth & Realtime DB/Firestore; handled state with Provider. - Localized AR/EN UI, wrote basic widget/unit tests, and followed Git branching & code reviews.	
Communication Officer (Part-Time) Intelligence Lab – Remote	Jun 2022 – Dec 2022
- Managed and grew the startup's social media presence by creating content and coordinating with designers. - Prepared marketing emails and maintained accurate customer contact lists for outreach campaigns. - Responded to customer inquiries and comments professionally, contributing to the brand's reputation.	

SOFTWARE PROJECTS

Anabta Educational Charitable Society Website | WordPress, cPanel

Aug 2025

- Designed and launched a bilingual (Arabic/English) nonprofit website for the Anabta Educational Charitable Society: Student Services, Activities, Partner Institutions, and Donate & Contact sections.
- Managed hosting via cPanel: set up domain on anabtaec.ps, configured DNS & SSL, and handled routine updates/backups.
- Implemented RTL-friendly, responsive layouts and language switching (AR/EN) for a smooth user experience.

Studify | Flutter, .NET Core, PostgreSQL, AWS S3, OpenAI API

Feb 2025 – Jul 2025

- Designed and built a cross-platform academic assistant mobile app to support students with smart scheduling, reminders, study tracking, and material organization.
- Integrated OpenAI-powered chatbot trained on AAUP academic policies to answer student questions using structured YAML profiles.
- Enabled semantic and voice-based PDF search using text-embedding-ada-002 and pgvector with PostgreSQL for AI-driven material retrieval.
- Implemented role-based access for Students, Faculty Managers, and Admins.
- Developed secure backend using .NET Core hosted on DigitalOcean, and used AWS S3 for file storage.

Note Taking App | Flutter, Firebase Firestore, Firebase Auth

Jan 2025 – Feb 2025

- Created a full-featured note-taking application using Flutter and Firebase with support for Google Sign-In and email/password authentication via Firebase Auth.
- Used Firebase Firestore to structure notes using collections and subcollections, ensuring real-time synchronization and secure data storage.
- Built user-friendly UI with functionality to add, edit, and delete notes across multiple categories.

TIKITAKA | Flutter, REST API, Provider

Oct 2024 – Dec 2024

- Developed a mobile football match tracking app using Flutter and integrated a RESTful API to fetch live match data, news, and team lineups from multiple leagues.
- Implemented a clean and interactive user interface using Provider for state management and smooth data flow across the app.
- Focused on delivering real-time updates, intuitive design, and responsive layouts tailored for football fans.

Electronics Shop Website | HTML, CSS, JavaScript, .NET 6

Mar 2024 – Jun 2024

- Developed a responsive e-commerce web application for an electronics store using front-end technologies and a robust backend with .NET 6.
- Integrated secure user authentication and checkout process for seamless product purchases.
- Designed intuitive product listing, cart, and admin dashboard pages with form validation and session handling.
- Gained hands-on experience in full-stack web development and deploying modern e-commerce features.

Banking System Project | MySQL, SQL, Draw.io

Oct 2022 – Jan 2023

- Designed and implemented a banking management system as part of academic coursework using MySQL and SQL.
- Created a detailed Entity-Relationship Diagram (ERD) using Draw.io to visualize and build the database schema.

TECHNICAL SKILLS

- **Languages:** C++, Java, HTML, CSS, JavaScript, Dart, SQL, Python
- **Frameworks/Tools:** Flutter, Spring Boot, Firebase, WordPress, .NET 6, MySQL, Draw.io, Microsoft Programs, Email, Jira, Slack, [GitHub](#), GitHub Copilot, Cursor, ChatGPT.
- **Technologies:** REST APIs, Firebase Authentication, Firestore, Spring Security

SKILLS

- Communication Skills
- Team work and Collaboration
- Creativity and Innovation
- Technical Writing
- Adaptability and flexibility
- Self-motivation and initiative.
